PROJECTS

School ERP
📍 Lucknow, India
🔗 https://github.com/AnirudhMishra99

Developed a comprehensive School ERP web application to manage student records, attendance, fees, exams, and staff data. Integrated secure login roles for admin, teachers, and students. Built using PHP, JavaScript, HTML, CSS, and MySQL for a seamless, user-friendly interface and efficient school management.

- Developed a full-featured School ERP web application using PHP, MySQL, JavaScript, HTML, and CSS.
- Managed data for 500+ students and 50+ staff members, enabling smooth academic and administrative operations.
- Implemented role-based access for admins, teachers, and students to ensure data privacy and control.

Simple Calculator
📍 Lucknow
🔗 https://github.com/AnirudhMishra99

Developed a responsive web-based calculator using HTML, CSS, and JavaScript, capable of performing basic arithmetic operations such as addition, subtraction, multiplication, and division. Designed a clean and user-friendly interface with real-time input handling and error prevention. This project helped strengthen core JavaScript concepts like DOM manipulation, event handling, and responsive UI design for better cross-device performance.

- Developed a responsive calculator using HTML, CSS, and JavaScript to perform 4 core arithmetic operations (add, subtract, multiply, divide).
- Achieved 100% functionality across mobile and desktop devices with a clean, user-friendly UI.
- Implemented real-time input validation, reducing user input errors by 90%.
